Forecast for Friday 24 Jun 2022

Weather: Mostly cloudy through the early hours with murky conditions developing at higher levels giving a little drizzle in places. Slowly brightening up through the morning but a few light showers remain possible. Some sunny spells during the early afternoon before skies cloud over with a band of heavy showers arriving through the evening. Clear periods and isolated showers following to end the day.

Chance of cloud-free hill tops above 800m: 20% at first, rising to 70% by noon. Falling to 40% for a few hours during the evening as the band of showery rain passes through.

Low Cloud and visibility: Extensive cloud above 400-500m at first, lifting and breaking to patches above 800m by noon. Most summits clearing for a time during the afternoon before periods of cloud above 500-600m develop in association with a band of showers early evening. Very poor visibility in cloud during the morning, improving to generally very good by the afternoon. Falling to poor during rain/showers in the evening.

Meteorologist's View

A low risk of the odd rumble of thunder as a band of showers passes through during the evening. Extra layers of clothing are recommended if you are heading to the summits, as it will be windy on the highest summits and generally feeling much cooler compared to the last few days.

Forecast for Saturday 25 Jun 2022

Weather: A day of sunny spells and showers. The showers will be most widespread through the morning and early afternoon and some will be heavy with a risk of thunder. Becoming drier to end the day with increasingly lengthy periods of sunshine. Quite a windy day with even a risk of gales on the highest summits.

Maximum wind: South-westerly 25-30 mph with occasional gusts of 40-45 mph.

Chance of cloud-free hill tops above 800m: 70%

Low Cloud and visibility: Excellent visibility for most of the time with distant hills clear to see. However, visibility will briefly deteriorate in and around showers with patches of cloud above 850-900m as showers pass over.

Temperature: **Valleys:** Plus 9 Celsius rising to plus 17 Celsius.
At 800m: Plus 6 Celsius rising to plus 10 Celsius.
Freezing level: Well above the summits.
